

- **Easy-to-use, Air Tight Locking System**

Patented silicone-gasket locking system and impermeable polypropylene keep out oxidizing air, sealing in flavor and nutrients.

- **Reduces the Growth of Bacteria**

Created by advanced technology, the container itself reduces mold and fungus, and keeps food fresher 3 to 4 times longer. EPA-approved and FDA-registered microscopic silver particles are used as a natural anti-germ, anti-mold and anti-fungus agent to protect the container.

- **Dishwasher and Microwave Safe**

Place oso*fresh containers on the top shelf of the dishwasher as they may melt or warp if they come in contact with the heating element.

- Remove lid before microwaving.
- When reheating foods place microwave on low to medium heat only.
- Do not use oso*fresh containers to cook foods, only to reheat.
- When reheating foods be sure to use extra care if they are high in sugar, oil or fat.
- Reheating tomato-based sauces and foods may cause staining.

- **Freezer and Refrigerator Safe**

Stackable units come in an assortment of sizes, and are safe for serving and storing all types of food throughout your kitchen.

- **Spillproof and Shatterproof**

oso*fresh containers have undergone a series of testing, confirming that containers will not leak or shatter.

This product does not protect users or others against food-borne bacteria. Always wash containers before and after each use.

Warranty/Coverage

If purchased in the United States or Canada, oso*fresh containers will be replaced if they fail to perform under normal use for 90 days.

Simply return products with proof of purchase and sales receipt to:
